VIM changes lives

To the editor:

There are so many wonderful attributes to residing in Bloomington but one in particular embodies the soul of this community. My meager words can never reflect the magnitude of the impact this entity has on Bloomington. Every day citizens of this community lives are changed by the presence of Volunteers in Medicine, its staff and its volunteers.

For the last five years, I have had the pleasure of being a volunteer member of this organization. I can tell you with certainty that this organization strives and succeeds in enriching the lives and health of our citizens. The devotion and dedication of all of those involved in the success of VIM is inexhaustible, and because of that, there is no limit to the amount of good that is being done for Bloomington.

The effects are profound and far-reaching. Each day that I take my position at the front desk and face the sign that says "Healing begins with Hello" I am reminded of how fortunate Bloomington is to have Volunteers in Medicine cultivating healthier lives for our citizens. A heart felt thanks to all involved.

Debbie Horan
