

Volunteers in Medicine accept grant to help kids

Herald-Times

January 29, 2010

SPENCER — The Volunteers in Medicine (VIM) received a \$7,300 grant from the Boston Scientific Foundation to use for children in need.

The money will provide dental hygiene kits and educational programming about the importance of dental hygiene in support of the Owen County Clean Teeth Initiative.

Parents can also learn about medical services available to them from VIM. While VIM receives funding from the state department to assist in updating the facility and keeping up with demand, this grant will benefit mostly low-income people.
